**AMTI Purchases SVS 2500 for DHS Contract**  
*SVS 2500 to be Used for Critical Infrastructure Assessments*

September 14, 2004 - Portland, OR - iMove®, a leading provider of immersive video systems for the military, intelligence and critical infrastructure marketplace announces the order of a SVS 2500 by Applied Marine Technology, Inc.® (AMTI). AMTI is a leading supplier of professional and technical services for Homeland Security and the Global War on Terrorism.

The SVS 2500 immersive video will be used by AMTI for critical infrastructure vulnerability assessments and threat mitigation. The immersive video will be integrated into AMTI's Computer Based Assessment Tool as part of a larger programmatic deliverable to the Department of Homeland Security.

"Critical infrastructure assessments are an excellent use of iMove immersive video", said Jamie Finn, Director, Business Development. "The SVS 2500 is by far the easiest way to collect comprehensive and accurate imagery of large sites and facilities quickly, while providing the analyst all the data they need to make the appropriate actionable decision."

**About iMove, Inc.**

iMove is the leading provider of immersive visual solutions for mission-critical security and surveillance applications. iMove's solutions deliver higher resolution visual information and expanded situational awareness using automated features to dramatically enhance mission performance while reducing cost and complexity. Our solutions are deployed at home and abroad for the prevention of potentially catastrophic incidents associated with critical infrastructure and for intelligence and special operation forces mission planning and training systems.

**About AMTI**

AMTI is a service-disabled veteran-owned business headquartered in Virginia Beach, VA, with satellite offices in Alexandria, VA; Arlington, VA; Charleston, SC; Ponca City, OK; San Diego, CA; and Southern Pines, NC. A leading supplier of professional and technical services for Homeland Security and the Global War on Terrorism, AMTI provides government and private sector customers with expertise in training and exercises, information systems and communications, systems engineering and integration, visual communications, and the rapid prototyping of unique technical solutions. In addition, AMTI designs, develops, and manufactures communications, information technology, personal protection, and Explosive Ordnance Disposal (EOD) products. AMTI helps make customers more effective, better equipped, and more secure. For more information, go to [www.amti.net](http://www.amti.net).
