iMove Announces \$1.5 Million in New Product Sales
Immersive Video Mapping™ Provides Situational Awareness

September 19, 2005--PORTLAND, OR--iMove®, a leading provider of immersive video systems for the military, intelligence and commercial critical infrastructure marketplace announces the receipt of multiple orders in excess of \$1.5 million for its new generation GeoView product line.

“Immersive video mapping provides the situational awareness our customers require for their missions,” said John Herring, President and CEO. “The ability to provide an immersive ‘feet on the street’ perspective connected with overhead imagery and maps is a powerful resource for our customers.”

“The ability to ‘see everything’ is becoming a base requirement built into standard operating procedures for our customers,” said Jamie Finn, Director, Business Development. “iMove’s goal is to improve and simplify this process. The success of this goal is seen in the follow-on orders and self-referencing our customers are doing on iMove’s behalf.”

About iMove, Inc.

iMove is a leading provider of immersive visual solutions for mission-critical security and surveillance applications. iMove’s solutions deliver higher resolution visual information and expanded situational awareness using automated features to dramatically enhance mission performance while reducing cost and complexity. Our solutions are deployed at home and abroad for the prevention of potentially catastrophic incidents associated with critical infrastructure and for intelligence and special operation forces mission planning and training systems. iMove is based in Portland, Oregon.
